

Minutes of the Tenth Meeting of the Empowered Committee (EMC) of National Horticulture Mission (NHM) held on 22.02.2011.

Preliminary

The Tenth meeting of the Empowered Committee (EMC) of National Horticulture Mission (NHM) was held under the Chairmanship of Shri. Sanjeev Chopra, Joint Secretary on 22.02.2011 to consider the project proposals of the State Horticulture Missions (SHMs) of Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal. The list of participants is annexed.

Welcome address

Shri Shailendra Kumar, Director NHM and Member Secretary EMC welcomed the Chairman and Mission Director (NHM) and participants. He gave a brief account of the projects sanctioned under NHM.

Opening remarks by Chairman

The Chairman expressed satisfaction over the fact that various types of projects necessary for overall development of horticulture were being sanctioned under NHM. The production of horticulture crops in clusters is increasing rapidly due to the interventions of NHM and States needed to follow up on the outcomes and link infrastructure projects with production and consumption centres.

There is a felt need for promoting private investment in infrastructure projects like Terminal Market Complexes (TMC) in Public Private Partnership (PPP) mode for linking the production centres with the consumers. The Market infrastructure projects including TMC under NHM have been linked to market reforms in the concerned States where APMC Act has been amended as per the model circulated by this Ministry. He exhorted the States to amend the APMC Act and come up with market infrastructure projects including TMC projects.

States need to promote setting up of modified atmosphere storage with enhanced capacity having multi-chamber and multicommodity facilities for onion and vegetables for stabilizing the prices.

The Chairman pointed out the variations in the capital cost of projects like cold storage, ripening chambers and primary/mobile processing units. He stressed that States should formulate uniform eligible unit cost for the infrastructure projects, clearly indicating the cost of machinery and civil constructions .

For implementation of projects like organic farming and GAP certification, there is need for identifying agencies having expertise and resources for implementation and certification in the field. All the States needed to take up base line survey out of Mission Management component. He reiterated that States should follow a competitive bidding procedure for selection of agencies for execution of projects. States should recommend proposals for approval of Empowered Committee only after clearance of State Level Executive Committee (SLEC).

The Chairman also reviewed the progress of release and utilization of funds by States.

Director NHM made a detailed power point presentation of the projects. Based on justifications offered by the SHMs on the views expressed by various members, the decisions taken by the Committee on the State wise /project-wise proposals under NHM are as under:

5/10-EMC /GUJ	<p>Name: SHM Date of Receipt: 10.01.2011 Activity: Global GAP (5600 ha) Location: 6 Districts namely Ahmedabad, Bhavnagar, Junagadh, Mehsana, Surat, Banaskantha and Valsad. Crops selected for these districts are banana, mango, sapota, onion and cumin. Crops selected for Banaskantha is pomegranate. Project Cost: ₹ 560.00 lakh Project details: Global GAP - A certification program to recognize farms that adopt Good Agricultural Practices (GAP), operate in a sustainable and an environmentally friendly way, considering workers health and safety and yield produces that are of quality and safe for consumption. GAP is an integrated system to manage the hazards associated with the elements of land, input, processes and output of agricultural production to achieve productivity, sustainability, quality and safe produce. The produce shall be traceable to the farms where it has been produced and Packages are clearly marked with identification to enable traceability to farm or site of production. Basic requirement of Global GAP is record keeping, traceability, workers welfare, environmental safety, compliance of critical points and major musts of global gap standards, training of farmers, officers and group certification by an accredited agency for production of quality produce with minimum residue. The Global GAP certification is up to farm gate level. The instant project will be a group certification as per Global GAP standards which requires to be renewed yearly. The programme will include adoption as per Global GAP standards, record keeping, traceability, training of farmers, officers and group certification by an accredited agency.</p>	50.00	EMC approved the project and sanctioned ₹ 50.00 lakh as 50% cost for adoption and certification of 1000 ha during current year with the condition that compliance of Global Gap standards are met for adoption and certification is by accredited agency of Global Gap. SHM will follow competitive bidding process for selection of implementing, certifying agency and codal formalities for sourcing of infrastructure material.

	<p>Project details: University of Horticultural Sciences, Bagalkote has submitted a proposal for gardeners training at Kumbapur for training of gardeners (25 each batch) in two batches in a year. As per the norms of the scheme an amount of Rs. 8.50 lakh can be considered which includes stipend (Rs. 3.00 lakh), course material (Rs. 0.25 lakh), operational support (Rs. 5.25 lakh). One time infrastructure support has already been considered for Supervisor training at project no. 31. The syllabus of the training has been finalized as per the norms.</p>		commitment of availability of staff from the university.																		
33/10-EMC /KTK	<p>Name: SHM Date of Receipt: 04.01.2011 Activity: Grape raisin making Units (23) Location: Bagalkot and Bijapur Distt. Project Cost: ₹ 330.89 lakh Project details: SHM Karnataka has forwarded 23 projects proposals of entrepreneurs for setting up of primary processing units for making raisin at Bagalkot (14 Nos) and Bijapur (9 Nos) District. Raisin production is one of the important activities being undertaken in these districts. In order to hygienically make raisin out of fresh grapes, using solar energy, the instant proposal is for constructing permanent structures of angle iron covered with mesh. The life of structure is at least 15 years which can be taken as capital cost. The total project cost of 23 units is ₹ 330.89 lakh. The eligible capital cost is ₹ 263.45 lakh and cost of each unit is within the admissible limit of ₹ 24.00 lakh. The individual projects by farmers are being setup in production zones and have already established back ward linkages for sourcing of raw material from the farmers. All the projects are credit linked and loan has been sanctioned by various banks. The details are at Annexure – I.</p>	105.38	EMC approved the project and sanctioned ₹ 105.38 lakh as 40% credit linked back ended subsidy to 23 projects as per details in Annexure-I.

During the course of the deliberations, the following general decisions were also taken by the Empowered Committee.

- i. The Market infrastructure projects including TMC under NHM have been linked to market reforms. States will need to amend the APMC Act for availing assistance under these components. States should come up with Terminal Market Complexes (TMC) projects in Public Private Partnership (PPP) mode for linking the production centres with the consumers.
- ii. States will promote setting up of modified atmosphere storage with enhanced capacity having multi-chamber and multicommodity facilities for onion and vegetables for stabilizing the prices. The assistance for enhanced capacity exceeding 5000 MT limit, could be considered with the approval of competent body of NHM.
- iii. States should formulate uniform eligible unit cost for the infrastructure projects like cold storage, ripening chambers and primary/mobile processing units, clearly indicating the cost of machinery, civil constructions and means of finance.
- iv. NHM will initiate the process of identifying agencies having expertise and resources for implementation and certification of projects like organic farming and GAP certification. The public sector and private agencies involved in the process of adoption and certification of organic and GAP projects will be invited to make presentations and shortlisted as per laid down procedure.
- v. All States should follow competitive bidding procedure for selection of agencies for execution of projects.

- vi. Private investment in the sector should be encouraged and all projects should not be concentrated in public sector only.
- vii. All SHMs will ensure that the projects are appraised at State Level with due diligence and subsidy is worked out which is commensurate with promoter's share and in no case subsidy should exceed the term loan sanctioned by the lending bank.
- viii. All SHMs will ensure that projects relating to post harvest management, processing, marketing and development of other infrastructure facilities should have clear cut backward linkages to provide assured market to the producers. These details should be part of the project report.
- ix. The proposals should be submitted to the EMC of NHM only after approval of State Level Committee. This should be clearly indicated in the State proposal. SHM should also indicate that the projects of cold storages/CA/MA Storages are as per technical standards circulated by this Department.
- x. In case of projects in public sector, following procedures need to be observed strictly:
 - a) the economic viability of the unit should be worked out in order to ensure that it is self sustaining,
 - b) recurring expenditure, if any, has to be borne by the implementing institution,
 - c) The institute and SHM will submit certificate stating that required technical manpower is available for operating the unit on commercial lines.
- xi. All SHMs will regularly update the website giving details of expenditure and physical progress of projects sanctioned under NHM.
- xii. SHMs shall immediately provide details of year wise projects sanctioned, funds released by NHM/SHM, utilized and stage of completion/commercial production. In case funds are yet to be released by SHM, the reasons for delay.
- xiii. For credit linked projects, especially post harvest, cold storage, processing etc. subsidy will be released in two installments after verification regarding confirmation of technical standards issued by this Department in case of cold storage projects. First installment will be released by SHM after verifying the location and authenticity of entrepreneur and second installment will be released after submission of satisfactory progress report by Joint Inspection Team comprising of members from lending bank, SHM and District administration.
- xiv. SHMs will attach with every proposal the following documents without which the proposal will be treated as incomplete:
 - a. Techno-economic feasibility report.
 - b. Copy of bank sanction letter and appraisal note.
 - c. In case of cold storage, CA and MA storage projects – Data sheet, Certificate from Engineer, Architect regarding adoption of technical standards and protocol as per GOI guidelines,

The Chairman reiterated the need for proper utilization of funds released for various projects on time and submission of progress reports and utilization certificates to facilitate proper monitoring so as to achieve desired objectives and goals of the Mission.

The meeting ended with a vote of thanks to and from the Chair.
