

## **Minutes of the Ninth Meeting of the Empowered Committee (EMC) of National Horticulture Mission (NHM) held on 10.01.2011.**

### **Preliminary**

The Ninth meeting of the Empowered Committee (EMC) of National Horticulture Mission (NHM) was held under the chairmanship of Shri. Anup Kumar Thakur, Additional Secretary on 10.01.2011 to consider the project proposals of the State Horticulture Missions (SHMs) of Andhra Pradesh, Gujarat, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Punjab and Rajasthan. The list of participants is annexed.

### **Welcome address**

Shri Shailendra Kumar, Director NHM and Member Secretary EMC welcomed the Chairman, Mission Director and participants. He gave a brief account of the projects sanctioned under NHM and informed that during the initial years of implementation of scheme only few projects were sanctioned. Project based activity has picked up only after 2008- 2009, and so far 3965 projects had been sanctioned by EC and EMC of NHM. The total assistance sanctioned for implementation of these projects was to the tune of Rs. 887.73 crores.

### **Opening remarks by Chairman**

The Chairman expressed satisfaction over the fact that various types of projects necessary for overall development of horticulture were being sanctioned under NHM. Major components like cold storages, market infrastructure, organic farming and INM/IPM had received attention. States needed to follow up on the outcomes and link these infrastructure projects with production and consumption centres. Every project should enumerate the outcome in form of targets and should be completed within the projected implementation schedule. Public Private Partnership (PPP) models should be implemented in true spirit. All the States needed to take up base line survey out of Mission Management component. He pointed out the variations in the capital cost of projects like ripening chambers and cashew processing units. Componentwise analysis of the projects had to be done by NHM. He suggested the SHM's keep a track of all youth trained/benefitted under NHM scheme. It was also advised that for projects sanctioned for the Public Sector institutions, suitable instruments and mechanism should be worked out by SHM to ensure that the benefits and revenue generated by such institutions were further utilized for achieving the objectives of the Mission. SHM's should report the success stories of agribusiness ventures set up by the farmers benefitted under NHM schemes. The Chairman also reviewed the progress of release and utilization of funds by States.

### **Mission Directors' Statement**

Shri Sanjeev Chopra, Mission Director and Joint Secretary (NHM) expressed satisfaction over the number of projects being sanctioned under the scheme. He reiterated that States should follow a competitive bidding procedure for selection of agencies for execution of projects in public sector. He emphasized that States should take proactive role and utilize the funds released for implementation of the projects in a timely manner. Private investment in the sector should be encouraged and all projects should not be concentrated in public sector. States should appraise the projects before submitting for approval of Empowered Committee.

He also suggested that SHMs should take the initiative of taking up protected cultivation of vegetables in peri-urban areas and submit the proposals to Executive Committee of NHM. *The minutes of meeting on subject of protected cultivation of vegetables in peri-urban areas are being issued separately.*

Director NHM made a detailed power point presentation of the projects. Based on justifications offered by the SHMs on the views expressed by various members, the decisions taken by the Committee on the State wise /project-wise proposals under NHM are as under:

1/9-EMC/KTK	<p><b>Name:</b> SHM  <b>Date of Receipt:</b> 19.11.2010  <b>Activity:</b> Organic Farming &amp; Certification  <b>Location:</b> 29 Districts  <b>Project Cost:</b> ₹ 1556.00 lakh  <b>Project details:</b> SHM is already implementing adoption of organic farming in 7780 ha spread over 29 districts of the State through organic service providers. SHM has proposed NHM assistance of ₹ 10000/ha @ 50% cost and certification cost of ₹ 5.00 lakh/cluster for 155 clusters which is within the norms of the scheme. The total cost of ₹ 1556.00 lakh for adoption and certification of 7780 ha is spread over a period of 3 years. The area to be covered in each district ranges from 550 – 1450 ha. The project taken up for organic farming production will be audited and certified by the competent agency accredited by the APEDA within the stipulated time. The service obligation of the organic certifying agency is to act as 3<sup>rd</sup> party independent assessor that would verify the system and processes involved in implementation of organic production by employing qualified auditors for regular inspection of the fields. SHM has set up reporting system to ensure regular monitoring of the conditions/requirements of project implementation and will submit the report to NHM.</p>	1553.00	EMC approved the project and sanctioned ₹ 1553.00 lakh (₹ 778.00 lakh for adoption and ₹ 775.00lakh for certification of 155 clusters. The funds to be released over a period of three years as per laid down procedure for adoption and certification process. SHM will ensure that National Centre for Organic Farming (NCOF)/RCOF visits the project area periodically to inspect the implementation status of the project.

/KTK	<p><b>Activity:</b> Grape Dehydration Units (98 Units)  <b>Location:</b> Bijapur, Bagalkot and Belgaum Distt.  <b>Project Cost:</b> ₹ 668.39 lakh  <b>Project details:</b> SHM Karnataka have forwarded 98 projects proposals of entrepreneurs for setting up of primary processing units at Bijapur (11 Nos), Belgaum (75 No) and Bagalkot (12 Nos) Districts. The proposals are for grape dehydration units. The projects have established backward linkages with farmers. Raisin production is one of the important activities being undertaken in Bijapur, Bagalkot and Belgaum districts. For production of quality raisins, grapes are harvested graded, washed and dipped in a solution containing 1 liter of Ethyloleate and 2.0 Kg of Potassium carbonate (K<sub>2</sub>CO<sub>3</sub>) per 100 liter of water (pH 9.5 – 11.0) for 3-5 minutes. Bunches of grapes are spread over nylon nets @ 1-1.5 kg per sq. ft. After 2-3 days, bunches are sprayed with the above solution at 1/3<sup>rd</sup> concentration. Some manufactures give sulphur fumigation treatment @ 3g/kg for 3 hours after dipping the grape in above solution to produce yellow colour raisins. The drying is complete within 15-21 days. In order to hygienically make raisin out of fresh grapes, using solar energy, the instant proposal is for constructing permanent structures of angle iron covered with mesh. The life of structure is at least 15 years which can be taken as capital cost.  The total project cost of 98 units is ₹ 668.39 lakh. The eligible capital cost is ₹ 599.25 lakh and cost of each unit is within the admissible limit of ₹ 24.00 lakh. The individual projects by farmers are being setup in production zones and have already established back ward linkages for sourcing of raw material from the farmers. All the projects are credit linked and loan has been sanctioned by various banks. The details are at annexure – I.</p>		<p>sanctioned ₹ 239.70 lakh as 40% credit linked back ended subsidy to 98 projects as per details in <b>Annexure-I.</b> It was also advised that SHM should approve model type design for these projects and costing of its components so that it remains uniform for all beneficiaries in future.</p>

<b>EMC /MAH</b>	<p><b>Date of Receipt:</b> 01.11.2010  <b>Activity:</b> Bio Control Lab.  <b>Location:</b> NH – 6 Talao raod, S. No. 912, Khamgaon, Dist. Buldhana  <b>Project Cost:</b> ₹ 36.45 lakh  <b>Project details:</b> This is a public sector company of Maharashtra Government who propose to setup a Bio control Lab for mass production of Trichoderma Viride to be sold to farmers at reasonable prices for the purpose of seed treatment to increase the yield. Trichoderma is an eco-friendly biofungicide containing the spores and enzyme complexes of Trichoderma. They affect a wide range of plant pathogenic fungi, blights and spots. The product is a wettable powder formulation that contains 2 x 10<sup>9</sup> colony forming units (c.f.u.) per gm. The hyphae of Trichoderma wraps around the pathogen fungi and produces antibiotics and extracellular enzymes, which lysis the cell wall of these pathogens and damage them. The invaded fungus eventually collapses and disintegrates. It help in conversion of organic matters and essential nutrients to a form more easily available to the plants. It produces metabolites similar to plant hormones and vitamins that directly help, in plant growth. It suppress pathogenic fungi, such as, fusarium, Rhizoctonia. Scherotium, I Verticillium, Macrophomina, Alternaria, Helminthosporium, Myrothecium, Pyricularia, Colletorichum, Cercorspora, Ramularia and others that causes root/stam/foot rots, wilts, damping off, leaf blights and spots.</p> <table border="1" data-bbox="217 934 1079 1087"> <thead> <tr> <th colspan="2">Project cost as per DPR</th> <th colspan="2">Admissible Project Cost</th> <th>Adm. 37/9-EMC/MAH	<p><b>Name:</b> Mrs. Talekar N. S.  <b>Date of Receipt:</b> 03.11.2010  <b>Activity:</b> Raisin Processing Unit. (400 MT)  <b>Location:</b> A/p Kem. Tal. Karamala, Dist. Solapur</p>	8.24	EMC approved the project and sanctioned ₹ 8.24 lakh @ 40%																									

	<p><b>Project Cost:</b> ₹ 24.10 lakh  <b>Project details:</b> This is a proprietorship firm of Mrs. Nisha Shivaji Talekar who proposes to setup a raisin making unit. Raisin production is one of the important activities being undertaken in Nashik and Sangli districts. Generally two types of drying sheds are constructed i. e. Temporary sheds made of bamboo sticks (Kacha sheds) and permanent sheds (Pucca sheds) constructed with cement and angle iron. Kucha sheds need to be fabricated every year. For production of quality raisins, grapes are harvested graded, washed and dipped in a solution containing 1 liter of Ethyloleate and 2.0 Kg of Potassium carbonate (K<sub>2</sub>CO<sub>3</sub>) per 100 liter of water (pH 9.5 – 11.0) for 3-5 minutes. Bunches of grapes are spread over nylon nets @ 1-1.5 kg per sq. ft. After 2-3 days, bunches are sprayed with the above solution at 1/3<sup>rd</sup> concentration. Some manufactures give sulphur fumigation treatment @ 3g/kg for 3 hours after dipping the grape in above solution to produce yellow colour raisins. The drying is complete within 15-21 days.</p> <table border="1" data-bbox="219 667 1079 898"> <thead> <tr> <th colspan="2">Project cost as per DPR</th> <th colspan="2">Admissible Project Cost</th> <th>Adm. SHM will ensure to dovetail the components of training, capacity building, publicity, micro irrigation and administrative cost out of NHM and MI schemes.

respective AAP's by SHM.

EMC considered the proposal of SHM and approved Rs.541.50 lakh as NHM share for the current year.

**66/9-EMC /AP**

**Name:** SHM  
**Date of Receipt:** 16.11.2010  
**Activity:** Organic Farming - Adoption and Certification (1500 ha)  
**Location:** Mahboob Nagar, Nalgonda, Guntur, Rangareddy and Anantpur Districts  
**Project Cost:** ₹ 300.00 lakh  
**Project details:** SHM proposes to take up the adoption and certification of organic farming in 1500 ha. The project is proposed to be implemented through experienced NGO's in Organic Farming/Non- Pesticide Management (NPM). NGO's were selected through the District Committee headed by the Joint Collector, ADH concerned, JD (Agri.), P. D ., DRDA, P. D., DWMA, and DFO (Tech). The implementation of the scheme will start in the district after entering into a MOU with service providers The service providers are 1. K. N. Biosciences Research Foundation (KNBRF), Hyderabad, 2. Social Education and Voluntary Action (SEVA), Warangal, 3. M/s Spandana, Medak, 4. M/s Pragathi mahila Seva Sangam (PMSS), Nalgonda, 5. Society for Community Education & bEconomic Development (SCEED), 6. M/s Mallela Rural Development Society (MRDS), Nalgonda, 7. Association for Women Action in Rural Development (AWARD), 8. M/s Rural Studies and Development Society, (RSDS), Anantapur, 9. M/s Rural Area Backward People's Development Society, (RABPDS), Anantapur. The selected agency for organic farming certification is M/s Vedic Certification Agency (VOCA) Hyderabad which is easily accessible to the NGOs and Farmers as it is located in Hyderabad accredited by APEDA. The identified crops for adoption and certification will be Cocoa, Acid Lime, Mango, Cashew and Vegetable. As per AAP 1500 ha have been approved for adoption and certification in the State. National Centre of Organic Farming (NCOF) while supporting the proposal have informed that the proposal is based on proper planning and networking with proper selection of implementing agencies.

300.00

EMC approved the project and sanctioned ₹ 300.00 lakh for adoption and certification of 1500 ha. of organic farming. Funds will be released in three years as per laid down procedure of adoption and certification. SHM will follow competitive bidding process for selection of Certifying agency.

setup a multi chamber (2), multi-commodity cold storage with the capacity of 10000 MT. The company is planning to set up a state of art humidity controlled cold storage for fruits, vegetables, vegetables seeds, potato seeds and other horticultural crops at Shameerpet. This new facility would meet the global standards in cold storage and seed preservation. The proposed Humidity Controlled Cold Storage is having 12.30 lakh cubic feet storage and 3000 pallet positions with new age puf panels and is a single floor operation with RACKs erected upto 16 feet high and the movement of the stock is done with mechanized handling system, like fork lifts, pallet trucks and EOT cranes. The proposed plant and machinery is humidity controllers, ammonia receiver, air handler units, atmospheric condensers, panel boards, pallet truck and from lifts, racks, compressors, WOT cranes, generator and firefighting equipment etc. The company is using the latest technology and has enclosed certificate and the data sheet indicating that the cold storage is being set up as per new technical standards.

During the course of the deliberations, the following general decisions were also taken by the Empowered Committee.

- i. States need to follow up the outcomes and link infrastructure projects with production and consumption centres. Public Private Partnership (PPP) models should be implemented in true spirit.
- ii. All SHM's should keep a track of all youth trained /benefitted under NHM scheme and maintain a data base. SHM's should report about the success stories of agribusiness ventures set up by the farmers benefitted under NHM scheme.
- iii. The variation in capital cost of projects like ripening chambers and cashew processing units needs to be analysed by NHM.
- iv. All States should follow competitive bidding procedure for selection of agencies for execution of projects.
- v. Private investment in the sector should be encouraged and all projects should not be concentrated in public sector only.
- vi. All SHMs will ensure that the projects are appraised at State Level and subsidy is worked out which is commensurate with promoter's share and in no case subsidy should exceed the term loan sanctioned by the lending bank.
- vii. The status of utilization of funds and unspent balances was reviewed and it was observed that huge unspent balances were available with Andhra Pradesh and Maharashtra. It was decided to monitor utilization of funds closely before releasing of funds to these States.
- viii. All SHMs will ensure that projects relating to post harvest management, processing, marketing and development of other infrastructure facilities should

- have clear cut backward linkages to provide assured market to the producers. These details should be part of the project report.
- ix. The proposals should be submitted to the EMC of NHM only after approval of State Level Committee. This should be clearly indicated in the State proposal. SHM should also indicate that the projects of cold storages/CA/MA Storages are as per technical standards circulated by this Department.
  - x. In case of projects in public sector, following procedures need to be observed strictly:
    - a) the economic viability of the unit should be worked out in order to ensure that it is self sustaining,
    - b) recurring expenditure, if any, has to be borne by the implementing institution,
    - c) institute and SHM will submit certificate stating that required technical manpower is available for operating the unit on commercial lines.
  - xi. All SHMs will regularly update the website giving details of expenditure and physical progress of projects sanctioned under NHM.
  - xii. States will utilize funds from the unspent balance already available with them and submit audited utilization certificates for the year 2009-10 latest by January 30, 2010.
  - xiii. SHMs shall immediately provide details of year wise projects sanctioned, funds released by NHM/SHM, utilized and stage of completion/commercial production. In case funds are yet to be released by SHM, the reasons for delay.
  - xiv. States will submit Annual Reports and success stories under NHM immediately.
  - xv. For credit linked projects, especially post harvest, cold storage, processing etc. subsidy will be released in two installments after verification regarding confirmation of technical standards issued by this Department in case of cold storage projects. First installment will be released by SHM after verifying the location and authenticity of entrepreneur and second installment will be released after submission of satisfactory progress report by Joint Inspection Team comprising of members from lending bank, SHM and District administration.
  - xvi. SHMs will attach with every proposal the following documents without which the proposal will be treated as incomplete:
    - a. Techno-economic feasibility report.
    - b. Copy of bank sanction letter and appraisal note.
    - c. In case of cold storage, CA and MA storage projects – Data sheet, Certificate from Engineer, Architect regarding adoption of technical standards and protocol as per GOI guidelines,

The Chairman reiterated the need for proper utilization of funds released for various projects on time and submission of progress reports and utilization certificates to facilitate proper monitoring so as to achieve desired objectives and goals of the Mission.

The meeting ended with a vote of thanks to and from the Chair.

Meeting of the Empowered Committee (EMC) of National Horticulture Mission (NHM) held on January 10, 2011

S. No.	Name and Designation	Organization/ Department
